Sleep well, live better: Dorelan for hotels

Tailor-made bedding solutions: **quality proposals for a bed system tailored to individual hotel requirements.** This is the master concept of Dorelan's very own hotelier branch, the Italian brand and leading manufacturer of **mattresses and quality sleep systems.**

A unique offering inspired by the company's determination to distinguish itself in the hospitality sector: Dorelan is all too aware of the fact that a quality stay is determined by meticulous attention to the smallest details, impeccable management and the ability to provide unforgettable hospitality.

Hospitality is all about ensuring the well-being of guests, **providing them with everything they desire.** Holidaymakers of today are looking above all for a personalised experience they can live and share.

Experiential travel requires extensive product differentiation, especially when it comes to something as delicate as sleep: Dorelan is a partner that **interprets and builds total look projects, customised to satisfy any requirement.**

A dream-like experience

Tourists of today have very different interests and ways of interpreting travel, to the extent that **they focus on the personalisation of their holidays, by demanding a tailored guest experience.**

In light of this, **the quality of bed systems and mattresses becomes fundamental** as guests will spend one third of their holiday experience sleeping. Travel has become a **search for personal gratification and satisfaction** that inevitably depends on the quality of rest.

Everything that, just like a **bed system, results in a “wow-experience”, boosting this positive sensation** and generating increasingly high expectations. In this scenario, the world of internet and social media constantly influences travellers' choices, to the extent that each hotel **is now focused on the physical and emotional well-being of guests.**

Today a hotel is more than just a place to be visited: it is place for living. In this sense, the bed system experience guaranteed by Dorelan quality **culminates in a memorable, "better than home" guest experience.**

Those who sleep well will return: investing in the customer

Every single guest loves to **live extraordinary moments and wants to feel welcome, pampered and reassured.** They want a room with quality services, to have good care taken of them and to be able to savour little luxuries as part of an exclusive experience.

Quality sleep, the unique comfort guaranteed by the room and bed system, becomes one of the main drivers of hotel performance.

A passion for quality is a veritable production philosophy at Dorelan.

A state-of-the-art vision dedicated to two-fold customer satisfaction: an inimitable guest experience which is then shared with their loved ones, once their stay is over. **Therefore investing in a quality bed system means directly investing in the customer.**

So how is the comfort of a room created? With functional furnishings, the best soundproofing, impeccable cleanliness and a bed system created according to the guest's requirements. **The hotelier creates a genuine added value by conveying to customers and potential customers alike the presence of these important advantages that set them apart from the rest.**

Tailor-made bedding solution: customised rest

With over 50 years of experience in high-end bedding, Dorelan presents a **wide selection of tailored solutions by its division dedicated to the hotelier industry**, inspired by a desire for the utmost customisation of bed systems, both in terms of comfort and design.

Our philosophy of “Tailor-made bedding solutions” enables hotels who believe in the customisation of a state-of-the-art bed system to **make aware choices and invest in assets that generate business and a veritable added value in the long term.**

How can sleep be customised? By creating products that adapt to each hotel's clientèle, with the utmost attention to details and meticulously curated functionality. **The quality of rest becomes a differentiating element, an absolute value thanks to multiple product combinations.**

Dorelan listens to the requirements of hoteliers on a daily basis and always develops the best solution according to the objectives of the room by **proposing an integrated bed system combining the mattress with fundamental and determining elements like pillows, toppers, sommiers and headboards.**

At the hotel's service: An all-round partner

Dorelan has always grounded its business in the quality of experience and is all too aware of the importance of full customer support. The company provides a **system including consultancy, supply, after-sales assistance and support, enabling the client to make the most of their investment.**

A commercial strategy and company organisation are crucial if a hotel is to generate value and satisfy all aspects of hospitality: **not only do guests return but positive word-of-mouth starts to spread.**

Tourists of today are won over with an offering that stimulates emotions and leaves positive memories of the experience, which is why selecting not just suppliers, but veritable partners who are competent, reliable, efficient and above all effective, is so crucial.

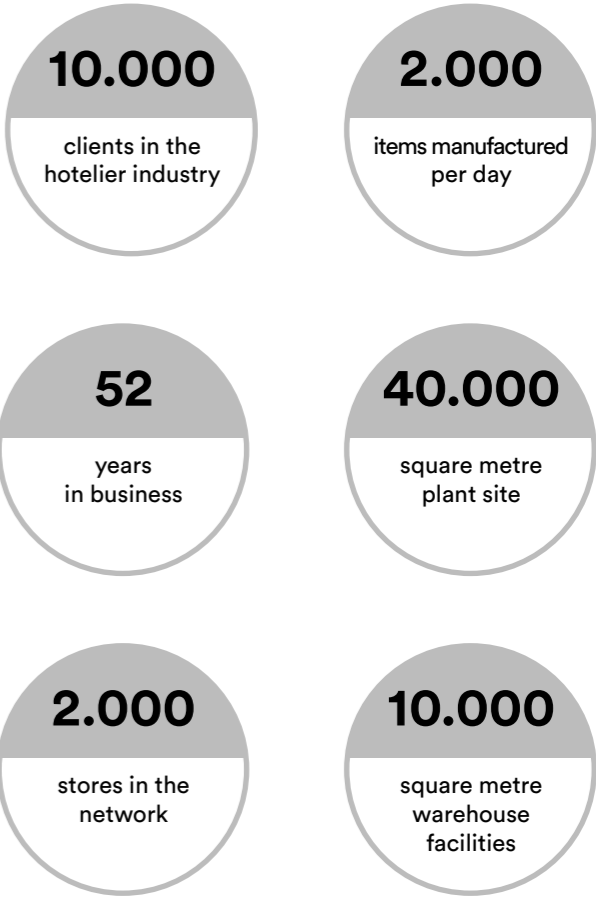

The history of Dorelan

Numbers speak for themselves when identifying a trusted partner: Dorelan is an exclusively Italian company with over 50 years of experience, **supported by a network of over 2.000 stores worldwide and over 10.000 global clients** in the hotelier and cruise tourism industry.

The Dorelan story first began in 1968 when Pietro Paolo Bergamaschi and Diano Tura, armed with courage, ideas, passion and winning intuitions, gradually built the only Italian company who design and manufacture mattresses entirely at its own production facilities.

Strategically located on the A14 motorway in Forlì, the **40.000 square metre site** is organised into highly specialised divisions, with a 10.000 square metre warehousing facility fully stocked with products ready for delivery and a production line with a 2.000 item daily output.

Mattresses made with **Bonnel, LFK, Pocket springs**, as well as those fitted with the innovative **Twin System** and exclusive patented **Myform material**. Wooden and iron bed bases, beds, sommiers, headboards and a wide selection of accessories like pillows, toppers, covers and quilts make Dorelan a complete and flexible industrial business that promptly responds to all hospitality market requirements.

The hotel, always at the centre

The Dorelan mission in the Hotelier world is to provide each guest with a sleep experience during their stay at a hotel. This is possible thanks to the creation of customised bed systems that are meticulously curated down to the finest of details, specially designed to fulfil the specific requirements of each hotel's clientèle.

A winning strategy deployed **thanks to the strength of innovative ideas and "made in Italy know-how"**, coupled with the ability to fulfil hotelier industry requirements along with the drive to constantly present new comfort and design solutions.

All hotels, cruise lines and international hotel chains looking for a veritable Tailor-made service choose Dorelan because it embraces the challenge of designing a bed system dedicated to their clientèle, by means of a specific consultancy service.

For years Dorelan has been an important presence at all major national and international exhibition events of the industry, operates with a network of specialised, local-based consultants and presents itself as an exclusively Made in Italy company dedicated to placing the hotelier and their requirements at the centre of every project.

When quality is certified

Dorelan is committed to guaranteeing transparency and safety and over time the company has obtained a number of certifications, thanks to its high quality production standards, starting from its very own procedure document prepared in collaboration with Bocconi University in Milan, establishing **specific and compulsory regulations for the correct handling and management of raw and semi-finished materials, finished products, environments and staff, with the aim of guaranteeing optimal hygiene, integrity and cleanliness.**

These values have earned the company **Hygiene Certification issued by Bureau Veritas**, a leading body in quality control services, after verifying regulations and their implementation, followed up by periodic maintenance audits.

Dorelan is also **UNI EN ISO 9001** certified, confirming its **capacity to regularly supply products** that comply with statutory requirements and raise the level of customer satisfaction, in addition to implementing continuous improvement processes to the system.

Dorelan is also committed to tackling environmental impact and complies with rigorous policies by means of **LCA (Life Cycle Assessment)**, constantly monitoring the impact of its main production lines on the environment and human health.

HYGIENE CERTIFICATION

In 2017 Dorelan became the first Italian company in the bedding sector to guarantee its Customers with optimal hygiene for all its mattresses and pillows, thanks to new B&T S.p.A. optimal hygiene assurance specifications for all phases of its production cycle: from supply, production and transformation processes, through to packaging, shipment and delivery. The “HYGIENE GUARANTEE FOR MATTRESSES AND PILLOWS” adds value to the already high level of quality of our products.

LCA_LIFE CYCLE ASSESSMENT

In 2017 Dorelan chose Life Cycle Assessment (LCA) as a tool for its environmental strategy. LCA is an internationally recognised technique and regulated by the ISO 14040-14044 standards, for the correct assessment and disclosure of the environmental performance of products. LCA analysis is useful as it guides the redesign of products to minimise their impact and optimise the consumption of natural resources or reduce air, water or soil emissions.

QUALITY MANAGEMENT SYSTEM

Since 1999 B&T S.p.A. has been ISO 9001 certified and has conformed to the latest changes that the quality management system requires with the new ISO 9001 edition. This method requires a global review of the entire company's quality system and risk assessment in all company processes with consequent reorganisation, whenever required, to ensure continuous improvement and in turn manufacture and deliver mattresses and pillows in compliance with the promised long term performance, safety and reliability.

CATAS LABORATORY TRIALS

Dorelan mattresses and sommiers have undergone specific laboratory tests to guarantee their durability and firmness over time and in particular compliance with UNI EN ISO 1957 specifications on how to simulate mattress wear.

As established by this standard, parts of the mattress designed to support the bust, pelvis and legs are subjected to the pressure of a heavy roller for 30,000 cycles to simulate actual mattress use over approximately 10 years. Any variations in height, firmness and body support are recorded.

The regulation also requires the testing of parts of the mattress subjected to the greatest amount to stress when the user sits up and gets out of bed, specifically along the edge of the mattress.

Dorelan mattresses and sommiers maintain performance and comfort requirements over time within recommended tolerances specified by the UNI EN ISO 1334 standard.

CLASS 1 IM APPROVED

All upholstered furnishings by Dorelan for accommodation facilities within the field of application specified in Italian Ministerial Decree 26.06.1984 regarding the "Reaction to Fire Classification and categorisation for fire prevention purposes" as amended are certified fire reaction class 1 IM by laboratories authorised by the Italian Ministry of Interior.

Fire reaction certificates issued by a Laboratory authorised by the Italian Ministry of Interior define the degree of the tested product's participation in the fire, by subjecting a prototype to the UNI 9175, UNI 9175/FA1 testing method.

These products are then classified according to the Italian Ministry of Interior (issued by the Fire Emergency Department and the Central Direction of the Department of Civil Defence for Prevention and Technical Safety Area V Passive Protection - Reaction to Fire Classification Section) when Dorelan duly submits an application to this effect.

FIRE RETARDANT CONFORMITY WITH SAFETY REQUIREMENTS OF DÉCRET 2000-164 OF 23.02.2000

Dorelan products comply with the following requirements set forth in French Décret 2000-164 of 23.02.2000:

- non ignitability, based on the NF EN 597-1 standard and 2, NF EN ISO 12952-1 (cigarette test)
- hygiene, for down or feather, in accordance with the NF EN 1162 and 1164 standards.

Certificates of conformity with safety requirements are issued by laboratories accredited according to the NF EN 45011 ISO 17025 standard by a signatory of The European Cooperation for Accreditation (EA).

Dorelan applies the safety requirements set forth in Décret 2000-164 of 23.02.2000, for its pillows and quilts, as well as mattresses and coverbeds (in accordance with the NF EN 597-1 and NF EN 597-2 standards) of the contract series, even though these types of products are not subject to this obligation, so as to guarantee the same safety standards across all its products.

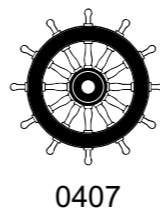

FIRE RETARDANT CERTIFICATION USA

All products illustrated in this catalogue can be produced in the USA version to ensure compliance with provisions set forth in federal law (16 CFR 1632 and 16 CFR 1633) for domestic use.

FIRE RETARDANT CERTIFICATION UK

All products illustrated in this catalogue can be produced in the UK version to ensure compliance with the BS 7177 standard and the use of expandables and fillings in compliance with Statutory Instrument 1324 Schedule 1 and composite fillers in compliance with BS 6807 source 2.

IMO FIRE RETARDANT CERTIFICATION

Dorelan mattresses and pillows for the naval sector guarantee fundamental safety aspects defined by the International Maritime Organisation (IMO) through the international SOLAS convention (Safety of life at sea) as they are designed, manufactured and certified for passive fire protection pursuant to the 2014/90/EU Directive (EUROPE) and USCG (USA) regarding Marine Equipment, which is why they carry the "wheelmark" of conformity.

Well-being and health above all else: the value of hygiene

Like all successful companies, the human factor is fundamental for Dorelan: **the production of quality products depends on a healthy and functional work environment**, which is why we take care of people and maintain a high level of control over product safety and hygiene.

Sanitisation has always been an important aspect for all actors in the tourism industry: from business people to suppliers right through to the guests themselves, it will remain a key aspect in the future.

The bed system is an investment that maintains maximum performance levels if correctly controlled and sanitised. This is why Dorelan provides hoteliers with daily operative criteria and useful advice on how to maintain a high degree of attention to product cleanliness and salubrity.

Thanks to a targeted analysis method, the use of rigorous control instruments and the commitment of all its staff, **the company produces items that comply with hygiene and quality certifications which aim to guarantee outstanding performance.**

Together to win: cutting edge strategies

In order to be a success, hospitality **requires continuous growth of the level of competencies** necessary to ensure the guest's stay at a hotel is an unforgettable experience.

Guests **want to experience unique moments**, especially in terms of the quality of rest. Placing your trust in Dorelan is a veritable investment that triggers a virtuous cycle in which the advantages of **excellent sleep generate approval**.

In order to offer guests a unique welcome and ensure they enjoy a memorable experience, **Dorelan has created a dedicated series: Guest Room Collection, an exclusive series of items that express the hotel's attention** to the well-being of its guests.

This includes the **Pillow Menu**, where each client can select the perfect pillow according to their tastes, and **Cushion Classics**, a collection of literary snippets, because what better way to find sleep than indulging in a good read and dreaming of distant lands.

Quality bed systems: the winning strategy for hotels

Tradition and research combine to provide tailored solutions for all hotelier clients: **Dorelan satisfies the needs of each hotel, creating a unique and distinctive added value** in terms of excellent rest and bedroom well-being.

Everything starts at the production site, where unique, state-of-the-art machinery, internally developed by the company with ad hoc modifications to heighten performance levels, enables the **creation of products that distinguish themselves due to their comfort and ability to fulfil the diverse requirements of the hotelier world.**

Dorelan is an ideal consultant, dedicated to supplying each hotel with a customised bedding system through multiple combinations that create special comfort, **fulfilling the different requirements of each guest and providing them with the experience they are looking for.**

PILLOW

Invaluable and indispensable accessories for well-being during rest, pillows are available in an extensive range of materials and shapes to satisfy all tastes.

TOPPERS

Lightweight, practical, easy to position and sanitise, toppers are distinctive elements of the bedding system, thanks to their ability to enhance mattress comfort.

MATTRESS

The prince of the Dorelan bed system, designed and built with exclusive technologies, for quality sleep and durability over time.

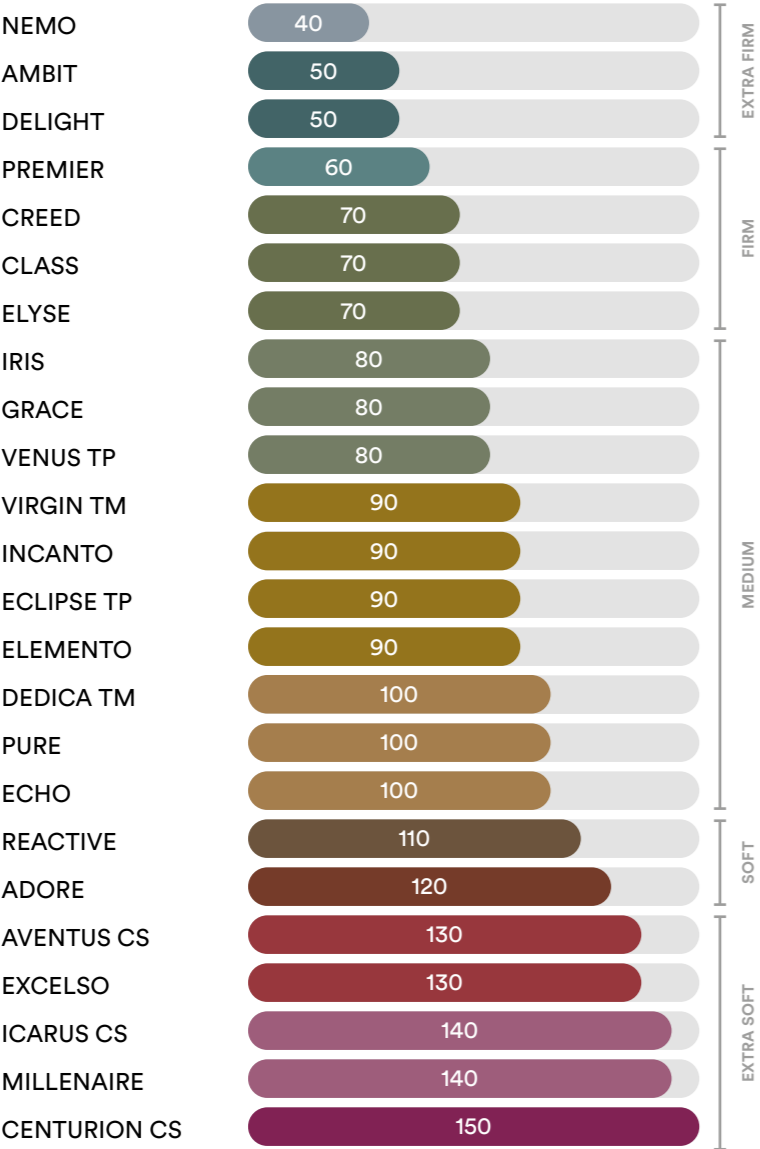

MYBED

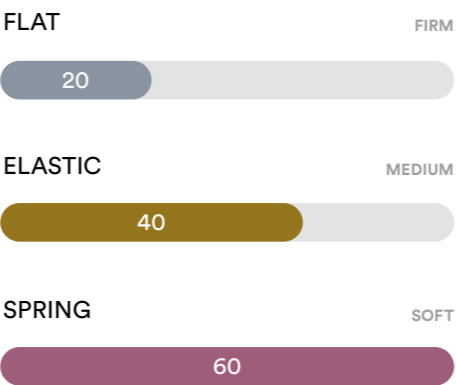

Fundamental elements of Tailor-made bedding solutions by Dorelan, available in a vast selection of fully customisable models.

COMFORT SCALE

M A T T R E S S E S

Mattresses

Thanks to its Tailor-made approach, Dorelan works in total synergy with hotels, developing bespoke solutions so they can create a **customised and innovative bed system, whose main element is the mattress.**

Solid, resistant and made from the most innovative technologies, Dorelan mattresses are some of the most coveted by the finest hotels in the world, due to their inimitable comfort and unmistakable design which distinguishes them.

Made from **absolute prime materials** with excellent hypoallergenic properties, mattresses are certified in accordance with the highest safety standards and designed to provide quality.

All this with a precise mission in mind: **to provide tailored comfort that guarantees guests with the luxury of unforgettable well-being.**

Technologies

SPRINGS AND MYFORM®

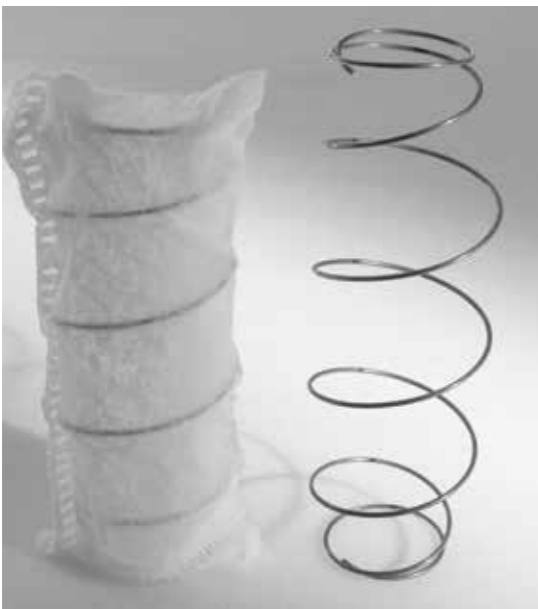

BONNEL SPRINGS

Traditional springing par excellence, providing solid and decisive support, made by Dorelan with the most innovative production technologies and prime quality materials. Guarantees perfect mattress duration over time, for healthy, comfortable and regenerating sleep, every single night.

Bonnel springs are made from phosphate coated carbon steel wire and their non-deformability is determined by a quenching treatment which guarantees correct mattress firmness and excellent duration.

Thanks to its 145 biconic springs per m², made from 2,2 mm wire with "spiral" system, Bonnel Dorelan springing ensures high-level and constant performance over time, coupled with a perfect anatomical response.

POCKET SPRINGS

Sleep quality, pleasant comfort and maintenance of performance levels over time are pillars of the success of **Soft Touch Dorelan**, the exclusive independent spring system developed to satisfy all sleep requirements.

The internal structure, **made from 330 pocket springs per m² with 1,7 mm wire and 7 Fisiomassage® zones, is designed to provide optimal support for different body areas and types**, providing correct physiological support.

Each Soft Touch spring, made from high quality materials and assembled with state-of-the-art technologies, is characterised by strongly independent interior movement, enabling the mattress to follow the shapes of the body with the utmost precision.

MYFORM®

Created in Dorelan laboratories, **Myform® is a family of high density, hypoallergenic and patented materials developed to provide the ultimate in ergonomics** and comfort during rest.

In the **Myform® Extension** version, with a density of 35 Kg per m³, thanks to an innovative molecular structure it provides comfort and breathability, coupled with excellent elasticity, fundamental for guaranteeing ease of movement during rest. The exclusive **Myform® Memory Air**, produced to an even higher density, 55 Kg per m³, was developed with the idea of creating a thermovisible and gradual return material capable of perfectly modelling to the shape of the body, guaranteeing breathability thanks to its open cell structure, while also ensuring freshness of rest and hygiene guaranteed over time.

Stringent chemical-physical tests to which Myform® Dorelan is subjected certify and guarantee total safety of use, resistance and product quality.

LFK SPRINGS

The exclusive **LFK** (Leicht Feder Kern - Light Weight Innerspring) springing is a revolutionary "smart" support system designed to support movement during rest and provides customised comfort for all body types.

The spring is fitted with an elastic variable response Firm Touch sensor, enabling it to adapt to different levels of pressure exerted by the body. Harmony and rapid reaction to movements during rest without compromising consistent support and sturdiness, typical of traditional springing. The structure consists of **260 springs/m², made from 1,9 mm phosphate coated carbon steel wire, resulting in a highly anatomical mattress, providing a unique combination of comfort that is truly one of a kind**. All this without compromising on solid and targeted inner support, combined with incredible sturdiness and duration over time, as certified by numerous tests.

TWIN SYSTEM® SPRINGS

Twin System® is representative of Dorelan innovation excellence in the field of technology applied to rest.

With its **600 dual concentric spiral springs/m², made from a single continuous 1,7 mm steel wire, Twin System® provides countless advantages**: in functional terms, the dual spiral guarantees maximum adaptability to all body types: while the internal helicoid modulates support according to applied weight, the external one defines ergonomic comfort. Simultaneously, at a structural level, the continuous wire guarantees utmost spring stability, coupled with sturdiness and resistance.

Cover

FABRICS AND PADDING

DYNAMIC

Featuring special double embroidery Blade Quilting, Dynamic is a perfect mix of sturdiness and comfort. Made from **Marie Jacquard fabric**, completely hypoallergenic, it distinguishes itself due to its extreme resistance and long duration, guaranteeing unaltered performance over time. Upholstery made from fine **HCS polyester microfibr**es, guarantees perfect elasticity and excellent breathability, not to mention a softness: for ultimate comfort during rest. The padded outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

ESSENCE

Quilted with the innovative double embroidery Ghost Quilting, Essence provides incredible elasticity and anatomical comfort. Made from elasticated **Future Stretch fabric**, it is an optimal solution for hotel use. The high quality of Future Stretch, made from highly resistant and elastic polyester fibres, is further enhanced by two exclusive treatments: Fiberbugs®, which inhibits the proliferation of bed bugs and Fibersan®, which wards off mites. The filling, made from **HCS polyester microfibre**, perfectly supported by a layer of high density Myform® Extension, ensures optimal breathability and extreme softness, for ultimate rest comfort. The padded outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

PILLOW TOP

Quilted with the innovative double embroidery design Ghost Quilting, Pillow Top is characterised by the presence of an additional topper that is hinged and washable, doubling the padding and enhancing mattress comfort, decorating it with the Marie Jacquard Grey side finishing. The filling, made from fine and hypoallergenic **HCS polyester microfibr**es, supported by a layer of high density Myform® Extension, guarantees perfect elasticity, optimal breathability and extreme softness. The **Future Stretch fabric** is further enhanced by two treatments: Fiberbugs®, which inhibits the proliferation of bed bugs and Fibersan®, which wards off mites. The padded outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

FISIOLOGY®

Quilted with the double embroidery design Ghost Quilting and made from elasticated **Future Stretch fabric**, Fisiology® is an optimal solution for hotel bed systems. On one side the filling consists of exclusive and patented **Myform® Memory Air**, a thermovaryable, gradual return and highly breathable material, and on the other side, of hypoallergenic high elasticity **HCS polyester microfibre**. The superior quality of Future Stretch is further enhanced by two plant-based treatments with essential oils: Fiberbugs®, which inhibits the proliferation and spread of dangerous bed bugs, and Fibersan®, which wards off mites. The upholstered outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

MY PILLOW TOP

Quilted with the innovative double embroidery design Ghost Quilting, My Pillow Top is characterised by the presence of an additional hinged topper, doubling the padding and enhancing mattress comfort, decorating it with the Marie Jacquard Grey side finishing. The filling consists of exclusive and patented **Myform® Memory Air**, a thermovaryable gradual return and highly breathable material that guarantees extreme surface softness, providing superlative rest comfort. The high quality of **Future Stretch fabric** is further enhanced by Fiberbugs®, exclusive plant-based treatments with essential oils that deter bed bugs, and Fibersan®, which wards off mites. The padded outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

TOUCH

Made exclusively from fabric, Touch distinguishes itself due to its fully removable cover and washability thanks to practical zips along the edge. Developed in elasticated **Future Stretch fabric** in the upper part and 3D Grey in the lower part, it provides the utmost resistance and breathability, enabling the creation of innovative bed systems, for guaranteed comfort. The design of the Touch cover perfectly defines bed aesthetics, eliminating the sensation of uncomfortable edges experienced when two single mattresses are pushed together to create a double bed. The possibility to remove and wash the cover ensures total mattress sanitisation, maintains perfect hygiene, refreshes fabrics and removes any organic traces.

DECOR

Quilted with the innovative sartorial double embroidered Tailor Quilting design, Decor is characterised by the presence of a rich and refined mattress finishing, with a Marie Jacquard Grey edge, for charming elegance and unbeatable comfort. Double Hybrid filling, containing the exclusive and soft **Myform® Memory Air**, paired with high density **HCS polyester microfibr**es, guarantees an excellent level of comfort. The high quality of **Atelier Stretch fabric**, made from soft, high elasticity polyester microfibres, is further enhanced by Fiberbugs® and Fibersan®, two exclusive plant-based treatments with essential oils. The upholstered outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

COMFORT SUITE®

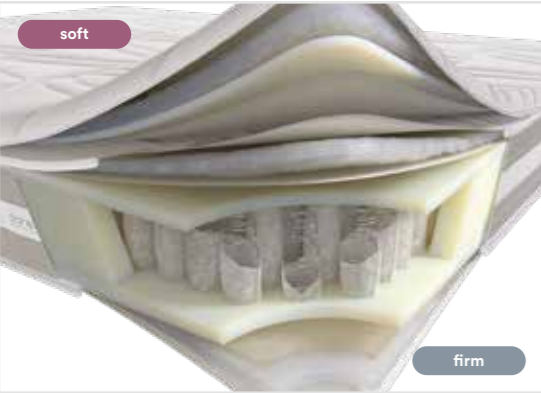

Quilted with the innovative sartorial double embroidery design Tailor Quilting, Comfort Suite® is characterised by the additional presence of a high-thickness hinged topper that exponentially enhances mattress comfort, already embellished with the Marie Jacquard Grey side finishing. Double Hybrid filling, containing exclusive and soft **Myform® Memory Air**, paired with high density **HCS polyester microfibr**es, guarantees an excellent level of comfort. The high quality of **Atelier Stretch fabric**, made from soft, high elasticity polyester microfibres, is further enhanced by Fiberbugs® and Fibersan®, two exclusive plant-based treatments with essential oils. The upholstered outer edge is fitted with practical handles and the innovative Respiro® system, created in Dorelan's Research and Development laboratories to ensure ultimate mattress breathability.

Comfort systems

THE ADVANTAGES OF COMFORT FLIP®

The ability of Dorelan to provide a bed system adapted to the requirements of each guest is due to the possibility of mattress customisation, thanks to **Comfort Flip® by Dorelan**: an exclusive variable padding and thickness system enabling the adjustment of mattress comfort.

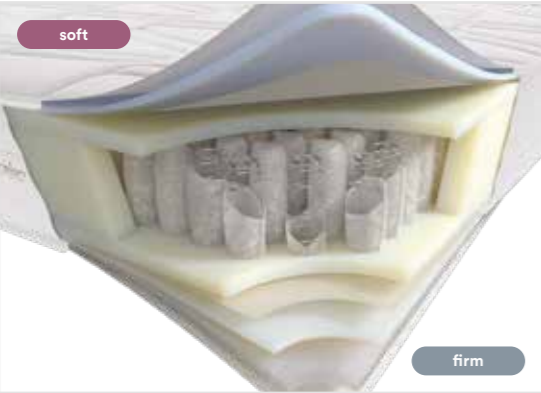

Therefore the hotelier can design the bed system, providing up to **5 different types of comfort**. For unprecedented differentiation and gradualness of comfort!

COMFORT FLIP® SYSTEM 1

The Soft side of the mattress is embellished by the **Poli Pillow Top**, the innovative topper with removable cover and zip. The filling is made from high elasticity HCS polyester microfibre and further enhances comfort provided by the mattress and its inner filling. The Firm side contains a soft HCS polyester microfibre filling.

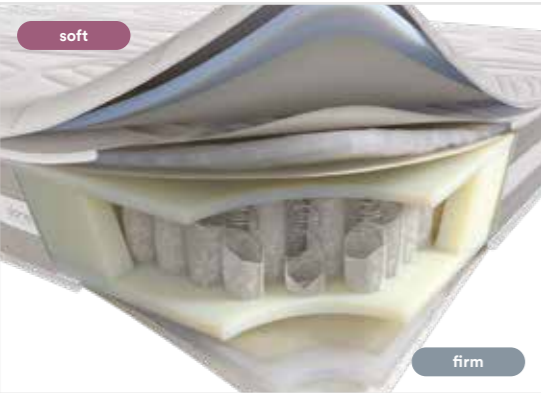

COMFORT FLIP® SYSTEM 1 is available as standard on models:
VENUS TP • ECLIPSE TP

COMFORT FLIP® SYSTEM 2

The Soft side of the mattress is made from **Myform® Memory Air**, a thermovisible gradual return and highly breathable material. The Firm side is made from soft and high elasticity HCS polyester microfibre.

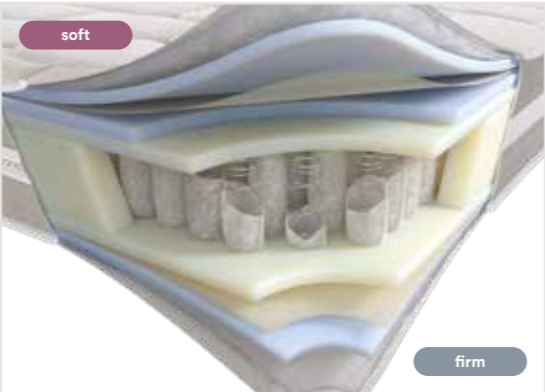

COMFORT FLIP® SYSTEM 2 is available as standard on models:
IRIS • INCANTO

COMFORT FLIP® SYSTEM 3

The Soft side of the mattress is embellished by **Myform® Pillow Top**, the innovative topper with removable cover and zip. The filling is made from fine Myform® Memory Air, further enhancing comfort provided by the mattress and its inner filling, also made from soft HCS polyester microfibre.

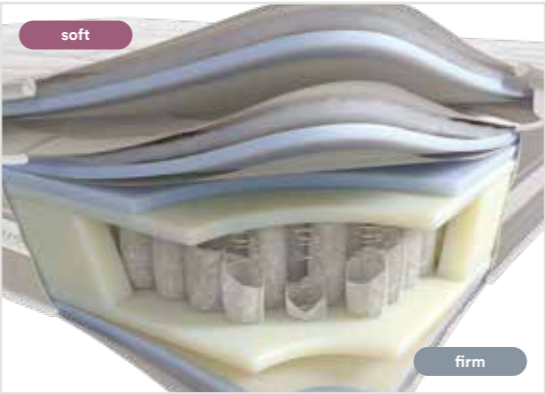

COMFORT FLIP® SYSTEM 3 is available as standard on models:
VIRGIN TM • DEDICA TM

COMFORT FLIP® SYSTEM 4

The Soft side presents an **extra layer of Myform® Memory Air**, positioned directly on the surface of the inner mattress box. Add to this special Hybrid filling, made from soft HCS polyester microfibre and Myform® Memory Air. Thanks to this innovative solution, the Soft side is even more comfortable and ergonomic.

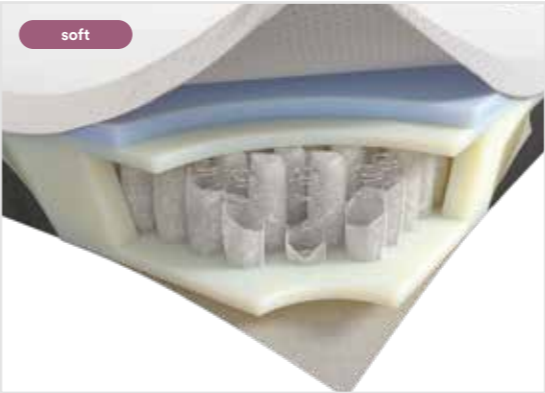

COMFORT FLIP® SYSTEM 4 is available as standard on models:
ELYSE • PURE • ADORE • EXCELSO • MILLENAIRE

COMFORT FLIP® SYSTEM 5

The Soft side is the same as for the Comfort Flip® System 4, with the addition of a refined **Comfort Suite® Royal** with removable cover featuring double, high-thickness Hybrid filling, made from soft high elasticity HCS polyester microfibre and exclusive Myform® Memory Air. Thanks to this combination, Comfort Flip System 5 achieves absolutely unbeatable levels of comfort.

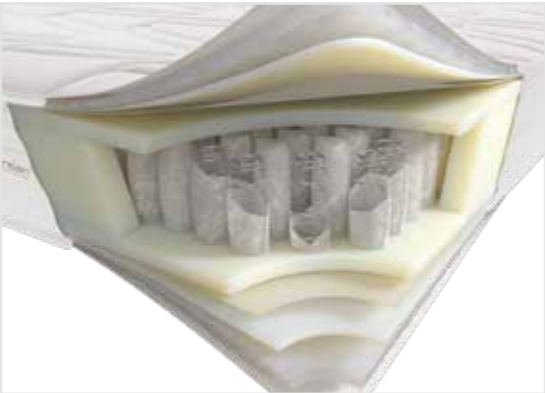

COMFORT FLIP® SYSTEM 5 is available as standard on models:
AVENTUS CS • ICARUS CS • CENTURION CS

NO FLIP SYSTEM

The system is based on the addition of an **extra layer of Myform® Memory Air**, a thermovisible gradual return and highly breathable material, positioned on the box system of spring mattresses. The cover is free from padding and is made from fine elasticated fabric, ensuring effortless cover removal and washability. Mattress maintenance requires nothing other than its periodic rotation from the head to the foot of the bed.

NO FLIP SYSTEM is available as standard on models:
ELEMENTO • ECHO • REACTIVE

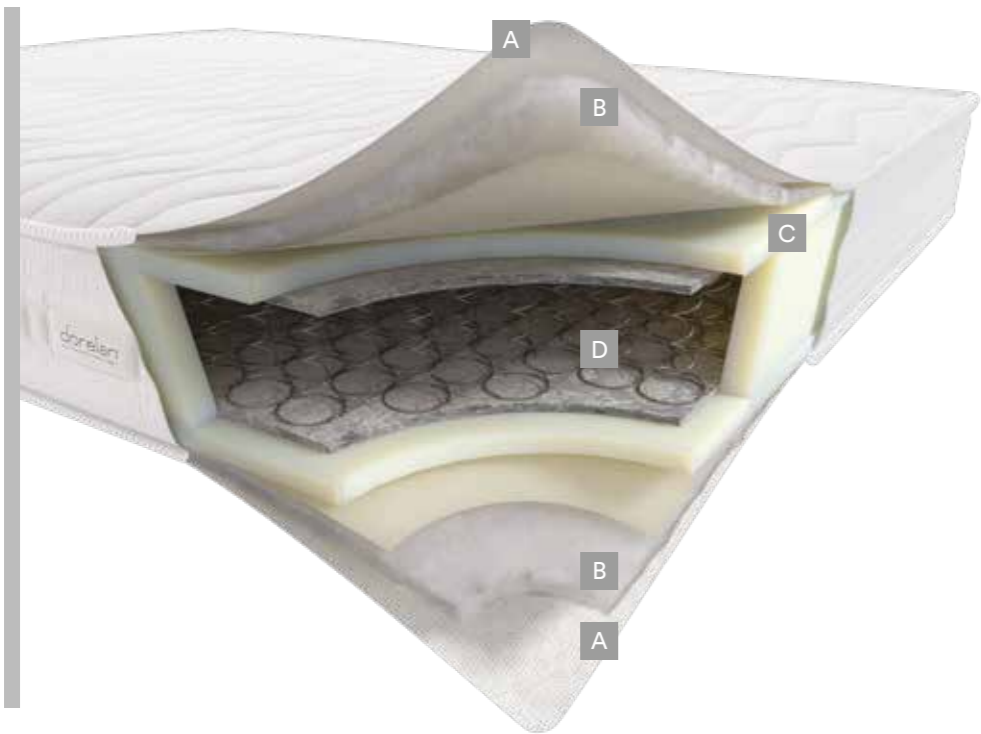

SMART SYSTEM

The system consists of **both sides of the same mattress offering the same comfort features**, thanks to the combination of soft HCS polyester microfibre in padded products, or generated by the presence of the same material on both sides of the inner structure, in the case of products with a fabric only cover.

SMART SYSTEM is available as standard on models:
AMBIT • PREMIER • CREED • CLASS • GRACE • NEMO • DELIGHT

DATA SHEET

- ▶ LFK spring mattress with 260 springs/m² in phosphate-coated carbon steel with 1,9 mm wire, with upper Firm Touch sensor with variable elastic response
 - ▶ Internal protection support in Spring Care felt fabric 900 gr/m²
 - ▶ High density 35 Kg/m³ Myform® Extension ergonomic layers
 - ▶ Non-deformable side Box System in high density 35 Kg/m³ Myform® Extension
 - ▶ Dynamic external cover with double electronic Blade Quilting embroidery
 - ▶ Covering in fire retardant hypoallergenic Marie Jacquard fabric
 - ▶ Padding in highly elastic hypoallergenic polyester HCS microfibras 350 gr/m²
 - ▶ Insulating layer made of resin and non-woven polyester fibre
 - ▶ Removable and washable Poli Pillow Top with double electronic Ghost Quilting embroidery and perimeter zip
 - ▶ Covering in fire retardant hypoallergenic Future Stretch fabric with plant based Fiberbugs® treatment against bed bugs and anti dust-mite Fibersan®
 - ▶ Padding in highly elastic hypoallergenic polyester HCS microfibras 350 gr/m²
 - ▶ Anti-Sinking quilted support made of high density 35 Kg/m³ Myform® Extension
 - ▶ Insulating layer made of resin and non-woven polyester fibre
 - ▶ Highly breathable padded perimeter band Respiro® made of Marie Jacquard Grey fabric
 - ▶ Ergonomic system for the seasonal handling of the mattress with four side handles
- Comfort Flip® System:** the mattress has an exclusive comfort selection system, increased thicknesses, with a soft side and a firm side (soft/firm)

- A** Removable Pillow Top Poli made of polyester HCS microfibras 350 gr/m² and Myform® Extension 35 Kg/m³ Anti Sinking covered in Future Stretch fabric

Toppers

Lightweight and practical, easy to position and sanitise, toppers are a distinctive element for all hotels looking to install a superior quality bed system. Increasingly appreciated due to its **capacity to seamlessly combine two single beds to create a double bed**, eliminating the edge where both mattresses are joined together.

A topper also serves other important functions, like **enhancing the comfort and cosiness of every single mattress, protecting it from dust, stains and mites, preserving its characteristics for longer.**

The Dorelan topper is available in three different versions: **Pillow Top**, a quilted model filled with a single layer with a maximum height of 3 cm; **Comfort Suite®**, with a double layer of padding and higher than 3 cm; **Topper** with a Myform® core in one or several variable thickness layers and a removable fabric cover.

Joining system

FROM SINGLE BED TO DOUBLE BED IN A FEW EASY STEPS

Transforming a single bed system into a double one has never been so easy.

The example shows how two single somniers are joined together using the connecting buckle, with two single mattresses joined together by the zip, completed by the addition of a topper to become a perfect double bed system.

step
1

SINGLE BED SYSTEMS

step
2

BOTH BEDS ARE BROUGHT TOGETHER AND MATTRESSES ARE SEAMLESSLY JOINED THANKS TO THE **CONNECTING ZIP** TO CREATE A DOUBLE BED SYSTEM

step
3

THE RESULTING BED SYSTEM IS COMPLETED WITH A SOFT **DOUBLE TOPPER** THAT PROVIDES A CONTINUOUS DOUBLE BED SURFACE

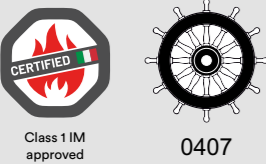

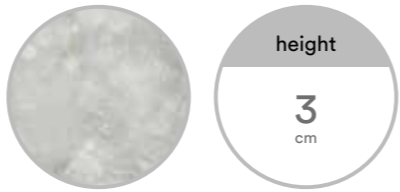

step
4

IN JUST A FEW AND SIMPLE STEPS THE SYSTEM IS TURNED INTO A DOUBLE BED

ACCESSORIES

Mattress covers, quilts and blankets

Mattress covers, pillow covers, duvets and blankets: a veritable collection of accessories, fundamental for guaranteeing a prime hotel sleep experience.

Because Dorelan is all too aware that **care and attention to detail makes all the difference in a quality bed system.**

This is why Dorelan offers a selection of products which optimally complement mattress and pillow performance, while also providing protection and enhancing the longevity of performance levels.

A complete range of mattress covers and pillow covers that are washable, resistant and provide **an invisible barrier against parasites and bacteria.**

Quilts and blankets are made from safe and prime quality materials, **guaranteeing product duration over time** and ensuring pleasant sensations of cosiness every single night.

Bugs Out

FULL-MATTRESS PROTECTOR WITH BUGS OUT SAFETY SYSTEM AND ZIP + PILLOW COVER WITH ZIP

DATA SHEET

- ▶ Double-layer, fire-retardant stretch polyester fabric and expanded polyurethane
- ▶ Water-resistant and breathable
- ▶ Physical barrier against bed bugs, mites and bacteria
- ▶ Washable at 60°C

DETAIL OF ZIP AND SAFETY DEVICE

THE PROBLEM
Cimex Lectularius infestation

Dorelan Hotel is always attentive to the needs of hoteliers, which is why today it provides a definitive solution to an extremely widespread problem: Cimex Lectularius infestation, better known as the "Bed Bug".

THE SOLUTION
To prevent the problem in a natural way

The Bugs Out cover creates a barrier that is totally impenetrable to all kinds of parasites, preventing them from getting inside and infesting the mattress. A technical solution that prevents the problem, without ever having to resort to emergency measures in response to an infestation that is already under way. Bugs Out is the ideal choice for protecting your mattresses: this type of cover provides a natural barrier against parasites thanks to the materials and technologies used to design and make it. Hoteliers too can sleep soundly, safe in the knowledge that their mattresses are protected from "undesired guests".

Safety without compromising comfort

Breathable and waterproof, the Bugs Out cover provides full mattress protection, ensuring longer product life and enabling hotel Guests to make the most of all the extraordinary characteristics of Dorelan Hotel mattresses, without compromising on comfortable and safe sleep, protected from all parasites.

MYBED

Sommiers and headboards

Sommiers and headboards are the elements which make up the MyBed collection: **a rich mix of furnishing solutions to complete and customise the bed system**, based on every hotel's needs. Available in countless matching options, bringing to life a series of veritable Tailor-made compositions.

Sommiers and headboards seamlessly combine sturdiness and functionality with design trends. They are made from fine materials, all **matchable and designed with the utmost regard for detail**. Choosing the right base means taking care of the mattress, enhancing its comfort and design.

An unmistakable touch of class to the style of all hotels, Mybed becomes both an elegant furnishing element and a fundamental support for the creation of a customised bed system.

Technologies

FLAT

For those who love to rest on a flat support, the Flat sommier surface is a technology developed to provide solid support.

Flat is made from slats listels supported by a fir wood perimeter structure, ensuring perfect stability for the entire bed system, while also guaranteeing the utmost breathability, thanks to the special cover containing a central non-slip and breathable area.

The entire sommier is upholstered in technical, high density material that generates a pleasant sensation of softness to the touch, protecting the mattress and increasing its duration over time.

ELASTIC

Designed for those looking for a bed system characterised by a perfect balance between cosiness and support, an Elastic surface is an ideal choice.

Its structure features vapour curved beech wood slats, providing impeccable mattress support and optimal ergonomics, ideal for traditional spring products.

Ideal for ensuring the breathability of the entire bed system, maintains perfect hygiene for all mattress types, for longer.

SPRING

Always at the service of wellbeing, excelling in technology and innovation, Dorelan presents the Spring system.

Designed to enhance the performance of all mattress types, Spring is based on an independent system of individually pocketed microsprings.

This solution enables the bed system to seamlessly adapt to body shapes, providing a precise and prompt reaction to all pressure and movement during sleep.

Dynamic comfort that adjusts to all requirements and body types for enhanced mattress performance, while the solid fir wood perimeter structure guarantees utmost solidity and stability over time.

The soft padding of the covering and the special cover, fitted with a central non-slip area, ensures utmost breathability and maintains impeccable hygiene for the entire bed system.

Materials

STRUCTURE

The solid load-bearing structure of the innovative configurable Mybed system is made of high quality fir wood. Its stability is further enhanced by a special corner attachment system for feet.

These characteristics mean that Mybed products effortlessly satisfy the highest quality standards in terms of resistance and duration over time, as proven by the results of stringent tests to which they are periodically subjected.

The possibility to customise the perimeter strip with different height options makes Mybed unique and versatile, aligning it with the latest design trends and making it suitable for satisfying multiple requirements from the hotelier world.

PADDING

Fine Mybed upholstery, made of high density Myform® Extension, an exclusive and patented material, fully cover the entire sommier structure, for a pleasant quality sensation to the touch and above all, guaranteeing fundamental protection against knocks, to which the external strip is particularly vulnerable, as well as a perfect and high performance support surface for any mattress.

COVERS

Mybed is available in an extensive range of faux leather and fabrics which distinguish themselves due to the variety of textures, innovative design, resistance and durability over time. The extensive selection of available colours makes Mybed fully customisable and ideal for the creation of tailored hotel room projects.

The special cover design satisfies all design requirements, without foregoing practicality of use.

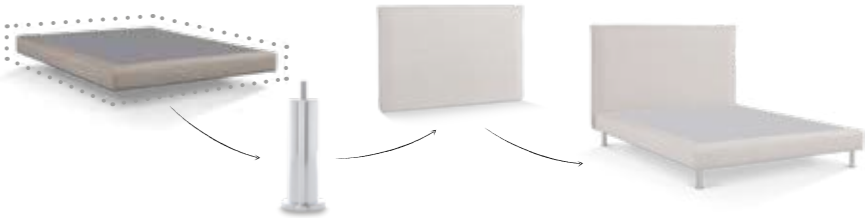

The fabric, positioned at the centre of the support surface, is specifically designed to be breathable and non-slip, enabling correct mattress positioning, whereas the bottom is fitted with a protective cloth, made of technical anti-dust material, which helps to preserve the perfect hygiene of the Mybed sommier.

ELASTIC

The curved wooden slat base is solid, long-lasting and functional, providing ELASTIC SUPPORT, good ergonomics and integral aeration for the entire bed system, for impeccable rest comfort. Ideal above all for combining with traditional spring products, it elevates mattress performance to excellence, extending its duration.

soft

SPRING

The Spring system consists of a surface with independent microsprings for ERGONOMIC SUPPORT, designed and developed to exalt the comfort of each mattress. This innovative system improves bed system adaptability to body shape while also reducing pressure on the mattress, guaranteeing more uniform and balanced use as well as longer-lasting performance levels over time.

CUSTOMISED FABRICS AND COLOURS

In order to satisfy the requirements of each hotel facility, we offer an extensive range of fabrics and colours that enable us to develop customised aesthetic solutions capable of enhancing any interior, in close collaboration with the client.

Request to browse the covers folder and create the bed system best adapted to your specific requirements.

Connecting buckles

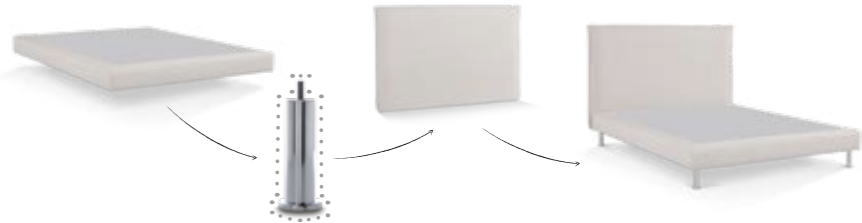

Connecting buckles enable the creation of a double sommier by bringing together two single ones, with the utmost safety and practicality, simply by fastening belts that are already fitted onto Dorelan Hotel single sommier.

ONLY AVAILABLE FOR FIXED SOMMIER

Storage sommiers, bed bases, additional beds

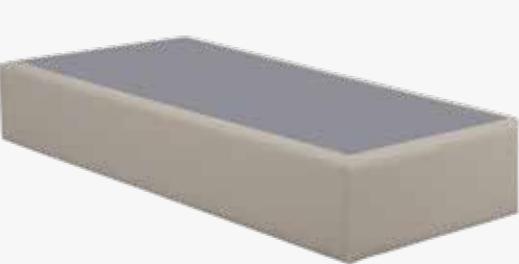

MySpace is the range created to provide hoteliers with bed bases fitted with storage or additional bed features, providing the utmost functionality for each room, without compromising on the quality of bed systems and design.

Sommiers with third pullout bed, drawers or with a liftable base for storage system feature in this range designed with the mission of optimally managing space, further enhancing customisation potential in functional terms.

MyBase is the section dedicated to slat bases that are robust and long-lasting, designed for use in hotels. It offers models designed according to different degrees of elasticity, each providing the utmost versatility.

Vertical is the innovative bed system: easy to handle and customise, thanks to additional coverings, it enables the addition of a third bed in the room in just a few simple moves.
